Advances in berth rates to Continental and United Kingdom ports were reported yesterday in the freight market for the first time in months, and there was evidence of a lull if not a complete cessation of the cutthroat struggle for cargoes that has been in progress between conference and non-conference lines. The more optimistic observers are convinced that a period of stabilized rates and profitable cargo movement has set in, after a half dozen of the leanest months in shipping history.

The United States Navigation Company, agents for the Reardon Smith Line, which has been undercutting the tariffs of the Continental and United Kingdom conferences, announced an advance in its provision rate to the United Kingdom ports were reported yes and solven and profitable cargo movement has set in, after a half dozen of the leanest months in shipping history.

The United States Navigation Company, agents for the Reardon Smith Line, which has been undercutting the tariffs of the Continental and United Kingdom conferences, announced an advance in its provision rate to the United Kingdom from 40 cents a hundred pounds to 50 cents and said that a further advance to 57 cents is an early possibility. The conference rate has been 80 cents. I was said as decreased to the control pounds of the contemplation.

Although it was denied that there has been any change in the Reardon Smith policy or that any agreement has been made with the conference lines, an official of the company said that their undoubtedly is a tendency toward more uniform rates. He said that the increases are justified by the better movement of eargo, together with several factors tending to divert business to freight lines operating out of North Atlante Doris.

The rush of passenger shipping is over, and liners age being put up for reconditioning, or diverted to cruises or services other than transatiantic. Negotiations again are under way for the purchase or operation of the vessels of the Green Star Steamship Company, it was learned yesterday. The seven large freighters on which the Equitable Trust Company issued mortgage bonds are concerned in the deal, and the i. H. W. Steele Company of New Grleans is understood to be interested in the acquisition of them.

Robert W. Adams, receiver for the Green Star, did not deny the report, contenting himself with the statement that there is nothing to be said at present. The vessels are laid up, and if acquired by the Steeles probably would be operated in a Panama-Pacific service out of Gulf ports.

The seasonal movement of grain from Atlantic ports is gathering force, and the shipment of the cotton crop from Gulf ports is beginning in volume. The latter will be felt especially, as the atonnage required to meet the demands of Europe is very large, and undoubtedly will divert many of the tramp vessels that otherwise would be seeking cargo at Atlantic ports.

October 1 higher insurance rates on cargo shipped from Montreal go into effect, an action anticipatory to the closing of navigation on the St. Lawrence November 15.
